

## Partition dividers for unstirred water baths

These partitions allow the working area of the bath to be divided for portion control. They separate the food into different sections for easy identification when cooking. They can also separate products that are just placed into the bath (and therefore not regenerated) from those 'on hold' ready to go.

### General:

---

Two sizes available to suit 300mm and 500mm wide chamber. By mixing sizes, various 'mini' chambers can be achieved.

P270 - Short Partition (270mm)

P470 - Long Partition (470mm)

Manufactured in UK

Clifton Food Range equipment is developed and manufactured by NICKEL-ELECTRO Ltd.
